DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Specie I, Figure 1C, down to exemplary cladding pumped fiber MOPA,

Specie II, Figure 4, down to exemplary core pumped fiber MOPA,

Specie III, Figure 8A and 8B, down to polarization maintaining fiber oscillator-amplifier coupled to a highly nonlinear fiber in conjunction with oscillation phase control system,

Specie IV, Figure 8C-E, down to controlling the beat signal related to the carrier envelope offset frequencies,

Specie V, Figure 8F-G, and 10A-B down to polarization maintaining fiber oscillator that facilitates generation of carrier envelope offset frequency beats for precision frequency comb generation,

Specie VI, Figure 11, down to design of a supercontinuum device

Specie VII, Figure 12, down to highly integrated frequency comb source with an in-line configuration, and

Specie VIII, Figure 13, down to frequency comb source with a single arm interferometer and a feedback system connected thereto.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims are not generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Art Unit: 2828

the prior art, the evidence or admission may be used in a rejection under 35

U.S.C. 103(a) of the other invention.
